📍 Kyiv, Ukraine, office/remote
   I can work during blackouts

Full Stack Developer with 5+ years in facade system design and 1+ years in web development, specializing in **React, Redux, TypeScript, Node.js,** and **PostgreSQL**. My engineering background sharpens my ability to create scalable, high-performance applications while balancing functionality and efficiency. Strong at **modular architecture**, **API integration**, and real-time **WebSocket** updates. Experienced in managing complex projects, meeting deadlines, and translating technical requirements into maintainable code. Eager to expand into **Vue**, **Angular**, and **React Native**.

Education

2015 – 2019
**Master's Degree:
Industrial and Civil Engineering**

Kyiv National University of Construction and Architecture

COURSES

- Fullstack course at Mate Academy
- Frontend course at HTML Academy
- ITVDN (React , JavaScript)
- CodeWars [266 Kata Completed]

SKILLS

- JavaScript, TypeScript, AJAX (Fetch)
- React, Redux Toolkit, Styled Components
- HTML5, BEM, CSS3, Sass (SCSS), Tailwind
- Node.js, Express, REST API, WebSockets
- SQL, PostgreSQL, Sequelize
- Git, Webpack, Eslint, Prettier
- Project Management: Trello, Jira
- Basics of OOP, server-side programming, Next.js

Language

English (Intermediate)

Portfolio

Timeless MET   Demo   GitHub Code

A responsive and modern landing page designed for a museum, utilizing HTML5 and SCSS for clean and maintainable code structure.

PowerTiles   Demo   GitHub Code

This project implements the 2048 game using JavaScript, HTML, and CSS/SCSS. The player can move the tiles in four directions (up, down, left, right) and combine identical tiles to increase the score

TaskFlow   Demo   GitHub Code

A React & TypeScript project built using Redux Toolkit to manage a simple Todo application. The app demonstrates clean code practices, structured state management, and a focus on reusable components.

TechShop   Demo   GitHub Code

This is a fully functional e-commerce application built with React and TypeScript. It includes features such as a product catalog, product details page, shopping cart, favorites, and more.

Experience

March 2025 – May 2025
Pixoram, Frontend Developer

Technologies: JavaScript, React, Typescript, HTML, CSS, SCSS, BEM, Redux Toolkit, GIT, WP
- Developed over 40 modern landing pages and promo websites using React and TypeScript, ensuring optimal loading speed across various devices.
- Actively collaborated with developers and designers, promptly processing feedback and implementing improvements, which accelerated the development of new features by 30%.
- Implemented performance optimization on more than 20 pages, reducing loading time by 40%. This improvement increased the Google PageSpeed Insights score from 70 to 95, decreasing the bounce rate by 20%.
- Ensured proper display of pages on mobile devices, tablets, and desktops, which improved conversion by 10%.

Feb 2024 – Feb 2025
Freelance, FullStack Developer

Technologies: JavaScript, React, Typescript, HTML, CSS, BEM, Redux Toolkit, Node.js, Express, GIT
- Developed web applications using React, TypeScript, HTML, and CSS, applying responsive design principles, and ensuring cross-browser compatibility.
- Created backend APIs using Node.js and Express, and connecting them to the frontend.
- Used Git to track changes and organize development work.
- Regularly solved algorithmic challenges to improve problem-solving skills.

Sep 2023 – Oct 2024
MaxiBud, Construction Engineer

- Managed 3 building projects simultaneously, ensuring timely completion and technical compliance.
- Developed and approved 7 residential and commercial projects within a year.
- Collaborated with architects and construction teams for project alignment and led facade projects from assignment to implementation.
